

Amaresh Kollipara

Program Producer
Space Venturing Forum

Amaresh is an entrepreneur pursuing new ventures in the aerospace and biotechnology fields. Prior to being an entrepreneur, Amaresh enjoyed a successful career in strategy consulting with Accenture. During this time, he developed management recommendations for clients in a variety of industries, including high technology, aerospace, communications, and retail. He specialized in creating business cases, operational plans, internet strategies, and M&A assessments. Amaresh's diverse professional experience also includes roles as a biotechnology researcher, planetarium presenter, and physics teacher.

He is an active member of several science and aerospace organizations which include the American Institute of Aeronautics and Astronautics, the California Space Authority, the National Space Society, and the Academy of Model Aeronautics. He has competed in the Office of Naval Research Design/Build/Fly competition for radio controlled aircraft.

Amaresh holds an MBA degree from the Graduate School of Business at Columbia University. In addition, he earned a B.A. in Molecular and Cell Biology with an emphasis in Neurobiology from the University of California at Berkeley.
