

Brian McClendon

Engineering Director
Google Maps, Google Earth, and Sketchup

Co-founder and investor of Keyhole Corp, Brian was VP of engineering from 2003 until its acquisition by Google in late 2004. He is now Engineering Director for Google Maps, Earth, and Sketchup.

With twenty years of technical development experience, Brian has focused on product execution and delivery in the context of complex graphics software and hardware. He was Director of Set-top Engineering with @Home and before that spent 8 years at Silicon Graphics managing system simulation/verification for Infinite Reality, Reality Engine, VGX, GTX, and GT. Brian received a BS/EE from the University of Kansas in 1986.
